# S4000 SoundServer

## Imerge S4000 SoundServer

**Imerge S4000 SoundServer** Due to popular demand, the 6th Generation SoundServer is now launched and ready to ship - Imerge continues to deliver premium multi-room entertainment with high end audio performance and proven heritage in music serving: The S4000 platform delivers multi-room audio fully integrated into the high end home.

### The GUI

The redesigned Graphical User Interface (GUI) combines sleek style and simple usability to provide a first-class browsing and control experience. The CoverArt services automatically provide your music with quality cover art images and up to the minute titles for all the latest music. Navigation has been simplified and expanded to include over 100 new features.

- The S4000 is our 6th generation SoundServer, built on many years of experience.
- 500GB of internal storage, for around 700 CDs stored uncompressed as WAV files, or as many as 80,000 MP3 files (at 128kb/s bitrate).
- Five independent outputs as standard.
- NEW! Integrated XiVA online music store - The Ultimate Evolution of Music Purchase. Enjoy music discovery from the comfort of your couch. Easily browse over 19 million songs.
- New! improved graphical user interface (GUI); simple to use and intuitive. Rediscover your collection and discover new content from the integrated XiVA Music Store
- Automatically archive your CD collection - just insert the album and we will take care of the rest.
- Proven integrated control - works seamlessly with control interface (AMX, Savant, Crestron, Opus etc.) as well as iPod and iPhone apps.
- Intuitive media navigation includes browse by cover art, the era of the music, year of release and individual tracks
